

My name is Rojak. I graduated from a foreign language academy in Bandung. I studied English subject for 4 years. Now I work as an English teacher at a school in Subang city in West Java. Two years ago I joined IS & A English classes in Bandung where I studied English class for almost a year.

Even though I live in a different city, I still keep contacting Mr.Dan. When I meet my students who are eager to study English but they can't afford to pay, I always contact Mr Dan if he can come to my hometown once a week to teach the students here.

Mr.Dan taught me a lot of ideas how to teach English as a second language. Now I am applying those ideas at my school. Also since Subang City is well known as a tourist city; sometimes I meet the tourists from abroad, so I would be pleased to help them explaining the tourism here. Again, thanks a lot for Mr Reggie and Mr Dan for having IS&A to help me. Sincerely,
Rojak

My name is Nur. I am 22 years old and now studying at a state Islamic university. While I study at university, I also learn English language taught by Mr. Dan through **International Scholars & Associates** organization.

After I finish studying at the university and get a degree, I hope to become a teacher at an elementary school.

Several years ago the Indonesian government decided that English

language lessons are needed to be taught to pupils in primary schools. I am sure that there will be many English terms that are often asked by my students to me.

Another reason I'm learning English is because I often find English words when I open the internet. Indonesia is a tourism country where there are many tourists visiting each year, so

if there is a chance for me to be a guide, I would be happy to explain the Indonesian to tourists in English. Sometimes tourists come to my village, and it challenges me to explain to them about the culture in my village.

Although I will teach general subjects in the future, still if I can master English, then I would be ready to be a substitute English teacher when it is needed. I love to read magazines and books in English and I want to understand the content in the books. I am very grateful to IS & A English class that helps me learn English. Thank you very much Mr. Keith and my teacher Mr. Dan
Nur F.

My name is Wildan. I am 18 years old. Now I study at a public education university for history subject teaching. Right now I also take an English class through **International Scholars & Associates** every Saturday. My teacher is Mr. Dan. I am very pleased to learn English with Mr. Dan because of the way he teaches is very easy for me to understand English language.

My goal is to learn English because I realize that English has become the world language. If I can master the

English language so it's easy for me when I communicate with people from around the world. I will work as a history teacher when I graduate from the university.

In the teaching of history, there will be a lesson that all of the histories of other countries have been well described, and some books will be written in English. So learning English is very useful for me.

One day I hope to have opportunity to travel and English as an international language will be indispensable when I'm abroad. When I am able to speak English better, I might teach the people who want to learn. It is easy for people who can speak English to get jobs because every company now needs people who speak good English oral and written comprehension. I would be very grateful for Mr. Dan and for the IS & A that helps us with lots of things.

Wildan
