

WE CAME FROM WHERE?

Evolution is FACT? It is? Since when?

Short and simple: Evolution says man came from a rock. That's what they believe; but individuals don't evolve their predetermined genetic bodies. Evolution says that some animals magically started growing wings during their lives when they didn't have it before. This photo makes it seem as if a monkey one day turned into a modern human.

What is wrong with this picture?

Lots!

Starting with... where is the woman?

Science wants us to believe... without any evidence that 1 man and 1 woman with all their billions of functioning parts in place, including a respiratory system in place; a gestation system in place; a hematologic system in place of blood flowing and all its multiple steps needed to clot and stop flowing; with the same skin function for hands and feet -- not only in the first man, but also in the first woman; yet with a different skin function for covering their butts and bellies and brains; 1 man and 1 woman yet one with distinct male reproduction capacity; while the other with distinct female reproduction... neither able to function without the other; and of course... both with eyeballs in place and fully functioning -- no part missing. That's what they want us to believe... without any observable evidence.

Science wants us to believe... that one day 1 man and 1 woman swimming somewhere in some primordial swamp on this planet... abruptly arose next to each other fully functioning and bumped into each other... and thus created humanity. That's what they want us to believe, but where is the evidence?

They want us to believe... that the whole universe and everything in it came from an explosion, but where is the evidence? They believe every living thing came from a rock – yet they show us no evidence.

But science only shows us this senseless graphic design on a page. So where are examples of all these fabulous gradations of life... happening today? I was at Starbucks and didn't notice a single Neanderthal!

Voltaire the atheist, like a 3rd grade class clown... ridiculed Isaac Newton saying: *Now look at that mighty mind of Newton who studied gravitation. When he became an old man and got into his second childhood, he began to study the book that is called the Bible. And it seems in order to credit its fabulous nonsense we must believe that the knowledge of mankind will be so increased that he will be able to travel at the rate of 50 miles an hour. The poor dullard! No man can travel at the rate of 30 miles an hour and get his breath!*

WE CAME FROM WHERE?

KJV-lite™ VERSES

www.ilibros.net/KJV-lite.html

So, was Newton the poor dullard? Or was the jackass Voltaire the dullard? And for many years, all the high school students I know... have never been wrong in their assessment – Voltaire wins the prize for dullard; and some will always add... but he sounds like a jackass, too.

Isaac Newton the father of modern physics – a great man of faith in God, said, *Blind metaphysical necessity could produce no variety of things. All that diversity of natural things which we find suited to different times and places could arise from nothing but the ideas and will of God. Gravity explains the motions of the planets, but it cannot explain who set the planets in motion. God governs all things and knows all that is or can be done.*

Dr. Michael Faraday, father of electromagnetism, another man who changed the world... perhaps the finest experimentalist in the halls of science; he considered religion and science as “two distinct things” and not to view as in conflict with each other. He was a deacon in his church.

Dr. Faraday said, *I cannot doubt that a glorious discovery in natural knowledge, and the wisdom and power of God in the creation, is awaiting our age, and that we may not only hope to see it, but even be honored to help in obtaining the victory over present ignorance and future knowledge.*

He said, *The Bible, and it alone, with nothing added to it nor taken away from it by man, is the sole and sufficient guide for each individual, at all times and in all circumstances.... for faith in the divinity and work of Christ is the gift of God, and the evidence of this faith is obedience to the commandment of Christ.*

Dr. Faraday also said, *I am very thankful that in the withdrawal of the powers and things of life, the good hope is left with me, which makes the contemplation of death a comfort – not a fear. Since peace is alone the gift of God, and as it is He who gives it, why should we be afraid? His unspeakable gift in His beloved Son is the ground of no doubtful hope.*

Dr. Dallas Willard of USC... when speaking on this subject, once said: ***if the physical universe can arise from nothing*** - which is something we're supposed to believe now days without question... ***then surely, a cup of tea can arise from nothing.***

The debate is really a question about: POWER! and who is really in charge, isn't it?

If you hear someone say: You sound like you believe in God... either your response will be a nice: **Yes!** Or, depending on their tone... it might be: **You sound like you don't.**

Jesus taught lessons of the **heart**... lessons of **love, joy** and **peace**... to students who understood him. Science isn't even sure the heart exists. Why? Because they can't find those things in their microscopes or telescopes. Does that mean they don't have a heart? Does that mean they are heartless? Or, does that mean they are just playing games?

In answer to the question:

We came from where? We came from God, who created all things in the beginning.

WE CAME FROM WHERE?

Dr. James Tour a brilliant scientist who got his PHD in Organic chemistry at Stanford and works with some of the top minds in the world... he made the greatest Jewish discovery: <https://youtu.be/QNGLZvtRoiU> !

Well to end the subject, join me as we sing the old song (circa 1,000 BC):

The fool has said in his heart: there is no God.
Psalm 14.

Understandably I reject evolution... and offer these wonderful YouTubes to enjoy:

In the Beginning God created the heaven and the earth;
